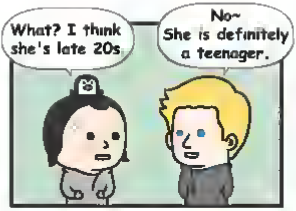
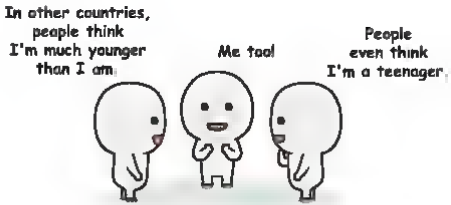
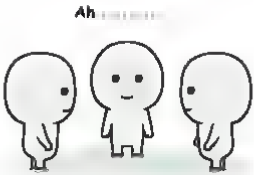
A Baby Face



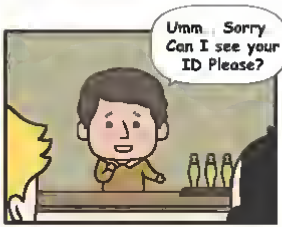
... I found that westerners have more mature faces than Asians.



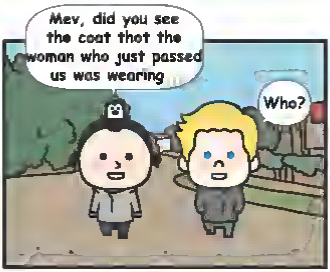
Asians often look younger than their real age compared to westerners.



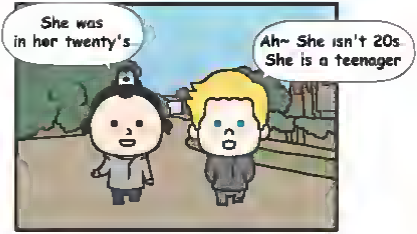
Here there are many people who think I'm younger than I am.



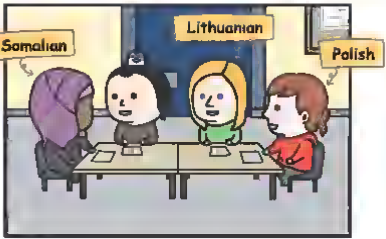
I sometimes get asked to show my ID in the pubs or shops.



I don't know exactly why but...

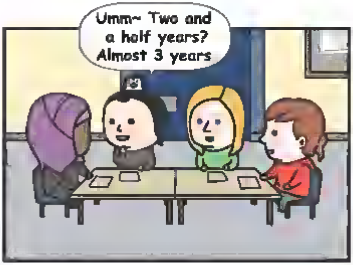


... when I compare
Asian people and westerners,...

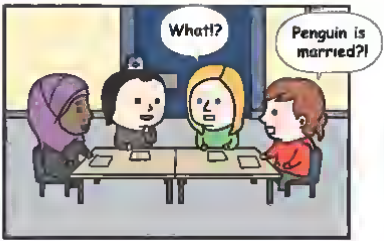


One day in my college English class, we were having a group discussion. After we finished the discussion we ended up talking about something else.

There was a member who already knew that I was married sa she asked me this question



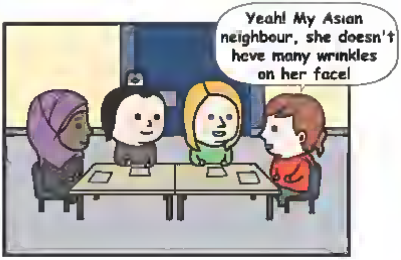
The other two members heard what we were talking about and...



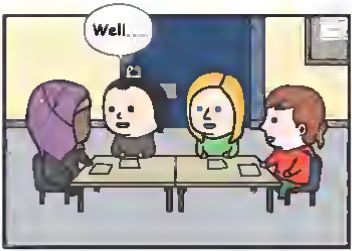
... they were very surprised
that I was married.

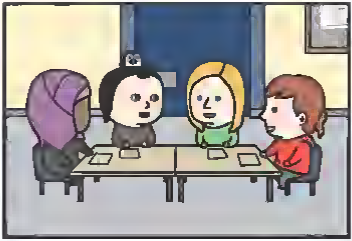
So I told them my opinion about Asian's having a baby face..

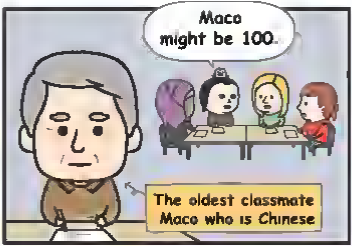
After we compared each other's ages, they were even more surprised because I was older than them.



Then they all agreed.







Maco might be 100.
The oldest classmate Maco who is Chinese
